

ClearOne and AVer: Working Together to provide the best audio and video collaboration experience.

With ClearOne's BMA 360 mic array and UNITE® Pro cameras, along with AVer's MT300N Matrix Tracking Box, conferencing users can now get real-time, voice-activated camera tracking and switching capability, ensuring every speaker is perfectly framed and heard.

Leveraging the BMA 360's advanced beamforming with over 100 MEMS microphones and the AVer MT300N's multi-camera switching capabilities, meeting spaces can now be designed with multiple cameras that are initiated by voice activated mic zones. Transform conference rooms, classrooms, and large meeting room spaces into dynamic, engaging environments with effortless, automated voice activate camera switching, setting a new standard for inclusive participation and communication efficiency.
